

Microsoft® Customer Immersion Experience

CIE Business Scenarios

1- CIE 2010 Light – about Wave 2010 Business Productivity Solutions

- If you are looking to upgrade or adopt the Office System 2010
- Scenario: Work Smarter with the 2010 Wave of Business Productivity Solutions
- Optional Add-On: 15-20 min video and guided discussion about Microsoft's Productivity Future Vision

2- CIE 2007 v3.0 – about Office System 2007

- If you thinking about or planning deployment
- Scenario: Choose from 11 Business Scenarios

CIE 2010 Light

CIE 2010 Light is one all-up scenario about the entire BPIO platform based on the Office System 2010.

Work Smarter with the 2010 Wave of Business Productivity Solutions

Experience a sales process common to most businesses and learn how to perform each task efficiently using the latest technology. The story involves an Account Manager responding to a time-sensitive and business-critical customer request.

Be hands-on with new time-saving functionality in:

- SharePoint 2010
- Office 2010
- Exchange 2010
- Office Communicator
- Windows 7

Additional 2010 scenarios will be released in May 2010.

Optional CIE 2010 Light Supplement - Microsoft Productivity Future Vision Video

In this 30-45 minute video presentation and discussion about Microsoft's future vision to catch a glimpse of Microsoft's continued long term commitment to innovation in the productivity space (beyond 2010).

See what the world **could** look like over the next 5-10 years.

- Based on existing technology explorations from Microsoft and across the industry
- Shows ideas from thought leaders in Microsoft product teams, Office Labs, and Microsoft research.
- Shaped by the feedback from customers and partners we received over the years.

Get excited about what's to come.

Microsoft® Customer Immersion Experience

CIE 2007 v3.0

Choose one or more of the 11 scenarios that provide an experience with the current platform and how it improves business productivity today.

1- Power Your Personal Productivity

Discover how the 2007 Microsoft® Office system and Windows 7® operating system can improve business productivity. Experience the time-saving features in Outlook, Word, Excel, PowerPoint, and OneNote.

2- Maximize Your Meetings

Experience how easy it is to set up and conduct virtual meetings through the use of Outlook 2007, LiveMeeting, and the Roundtable (a 360-degree web conferencing device).

3- The Easier Way to Search and Share

Learn about Microsoft enterprise search functionality. Try Windows Search preview to perform a search on the workstation, corporate portal, within business applications, and using advanced search.

4- Working Together and Saving Time Online

Create your own site, manage access permissions, and modify the site using web parts. Learn how to manage content on the portal, and how SharePoint Server 2007 integrates with other Office 2007 products.

5- Control Your Content Chaos

Discover the functionalities of SharePoint Server 2007 related to the electronic management of documents (permissions, versioning/commentaries, check-in/check-out, approval workflow, etc).

6- Save a Tree: Use an e-Form

Learn how to manage Web forms with Forms Server, control security and permissions, and implement workflows. Also learn how to create an InfoPath form starting from Word 2007, add mandatory fields and date picker, and upload to a SharePoint site to create a Web-based form.

7- Better Communication with Customers and Partners

Discover how you can give external users access to an internal SharePoint team site and control permissions for specific document libraries. Also explore the use of Office Groove 2007 to collaborate with external users on ad hoc, short-term projects.

8- Decision Making and Dashboards

Use a Microsoft-based executive dashboard to review key performance indicators, communicate business concerns, rationalize costs, find cost-reduction opportunities, and build new performance models.

9- Simplify Your Business Communications

Discover the features and functionalities of Office Communicator 2007 and its integration with mobile devices and other Office 2007 products.

Microsoft® Customer Immersion Experience

10-Explore Your Business through Social Networking

Discover the power of social computing through the use of My Sites, Wikis, Blogs, and other integrated community capabilities in Microsoft Office SharePoint Server 2007, Office Communications Server 2007, and Exchange Server 2007.

11-A Productive Day at Work

Discover how Microsoft products such as Office 2007, SharePoint Server 2007, Windows 7, and others contribute to better productivity in your everyday work life.
